

## **Multidimensional Solitons in Complex Continuous Media. Stability and Dynamics**

Vasily Yu. Belashov  
Kazan (Volga Region) Federal University, Kazan 420018, Russia

The multidimensional soliton dynamics in complex continuous media which is described by the generalized equations of the Belashov-Karpman (BK) system including the generalized Kadomtsev-Petviashvili (GKP), the derivative nonlinear Schrodinger (DNLS) and the generalized nonlinear Schrödinger (GNLS) classes of equations is studied analytically and numerically. In our investigations we take into account the generalizations relevant to various complex physical media including space plasma, atmosphere, hydrosphere and other complex dispersive media, with due account of the wave field's stochastic fluctuations that takes place always, on a level with the high-order dispersion effects, influence of dissipation and instabilities of different types. The results on evolution, structure, stability and interaction dynamics of the multidimensional nonlinear waves and solitons are presented. The analysis of stability of solutions is based on study of transformational properties of the Hamiltonian of the corresponding system. The structure of possible multidimensional solutions and their collisional interaction is studied numerically. This is consistent representation of the both earlier known and new original results obtained by authors and also some generalizations in theory of the nonlinear waves and solitons in complex dispersive media with presence of stochastic fluctuations of the wave field. Some applications of obtained results in real physical media including space plasma, atmosphere and hydrosphere are presented.

### **Biography**

Prof. Vasily Yu. Belashov, PhD (Radiophysics), DSci (Physics and Mathematics). He is Chief Scientist and Professor at the Kazan Federal University, and also Academician of the Russian Academy of Natural Sciences, and Official Reviewer in the American Mathematical Society and a Member of the Science Advisory Board, Official Reviewer of the Elsevier. He is author of 412 publications including 9 monographs.

### **Presenting author details**

Full name: Prof. Vasily Yu. Belashov

E-mail: vybelashov@yahoo.com

WhatsApp number: +79270308514

FB: <http://www.facebook.com/vybelashov>

Session name/ number: Applied Physics & Plasma Science

Category: Plenary Keynote talk
