Yakutian Diamond-Bearing  
Province

Magnetic and Mineralogical  
Analysis: Experiment,  
Theory, Applied Significance

Springer

# **SpringerBriefs in Earth Sciences**

SpringerBriefs in Earth Sciences present concise summaries of cutting-edge research and practical applications in all research areas across earth sciences. It publishes peer-reviewed monographs under the editorial supervision of an international advisory board with the aim to publish 8 to 12 weeks after acceptance. Featuring compact volumes of 50 to 125 pages (approx. 20,000–70,000 words), the series covers a range of content from professional to academic such as:

- timely reports of state-of-the art analytical techniques
- bridges between new research results
- snapshots of hot and/or emerging topics
- literature reviews
- in-depth case studies

Briefs will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, Briefs will be available for individual print and electronic purchase. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, easy-to-use manuscript preparation and formatting guidelines, and expedited production schedules.

Both solicited and unsolicited manuscripts are considered for publication in this series.

# Introduction

The monograph addresses magnetic properties of kimberlites, microilmenites and traps of the Yakutian Kimberlite Province introducing modern ideas about trap magmatism, kimberlites and diamonds. In addition, accessory ferromagnetic minerals (microilmenite and titanomagnetite) are studied in detail, and the methods of processing and interpreting the thermomagnetic curves and coercive spectra are also described. Finally, the monograph offers sample implementations of magnetic and mineralogical analysis applied to various geological problems. The monograph will be useful to the researchers interested in rock magnetism and paleomagnetism, as well as to the geologists and geophysicists engaged in kimberlite exploration.

# Contents

<b>1</b>	<b>Objects of Research</b> .....	1
1.1	Geological Description of Kimberlites, Diamonds and Trap Rocks .....	3
1.2	Major Ferromagnetic Minerals of Kimberlites .....	8
1.2.1	Picroilmenite .....	8
1.2.2	Chromespinelides .....	9
1.3	Major Ferromagnetic Minerals of Trap Formations .....	10
1.3.1	Titanomagnetite .....	10
1.3.2	Hemo-Ilmenite .....	11
1.3.3	Pyrite .....	12
1.4	Paramagnetism of Rock-Forming Dolerite Minerals .....	13
1.5	Conclusions .....	14
	References .....	14
<b>2</b>	<b>Instruments of Magnetic and Mineralogical Analysis</b> .....	19
	References .....	22
<b>3</b>	<b>Methods of Magnetic and Mineralogical Analysis</b> .....	23
3.1	Conventional Magnetic and Mineralogical Analysis .....	23
3.2	Decomposition of the Thermomagnetic Curves of Samples Containing Several Ferrimagnetic Minerals .....	25
3.3	Thermomagnetic Analysis of Picroilmenite .....	27
3.4	The Paramagnetic Component in Rock-Forming Dolerite Minerals .....	33
3.5	Titanomagnetite with Magnetite-Ulvospinel Exsolution Structure .....	44
3.6	Conclusions .....	57
	References .....	57

<b>4</b>	<b>Study of Kimberlites, Picroilmenites and Trap Formations</b> . . . . .	59
4.1	Study of Kimberlites . . . . .	59
4.1.1	Pyrite in Kimberlite . . . . .	59
4.1.2	Magnetic and Mineralogical Analysis of Kimberlites . . . . .	62
4.2	Study of Picroilmenites . . . . .	73
4.2.1	Picroilmenites Sampled from Different Pipes . . . . .	73
4.2.2	Picroilmenites Taken from the Zarnitsa Pipe . . . . .	75
4.2.3	Magnetite in Picroilmenite . . . . .	82
4.3	Conclusions . . . . .	88
4.4	Magnetic and Mineralogical Analysis of Traps . . . . .	88
4.5	Conclusions . . . . .	92
	References . . . . .	92
