

The article discusses a compilation strategy of composition of the Troickij sbornik XII-XIII centuries, using of new computer technology and electronic databases. The relationship of the Troickij sbornik with Paraenesis of Ephraim the Syrian and Pandects of Antiochus is considerent. Found that in the 494 block of the Troickij sbornik is a fragment of 105 Homilies of Ephraim the Syrian. It is proved that the linguotextological principles of compilation are based on numerology views.
