Human anatomy is a branch of biology that studies the morphology of the human body, its organs and systems. The origin and development of the human body, its shape and structure are the subject of human anatomy study. Human anatomy is one of the fundamental disciplines in medical and biological education. It is closely linked with such disciplines as anthropology, human physiology and comparative anatomy, evolutionary theory and genetics.
● Introduction to Human Anatomy.
● Osteology.
● Articular System I.
● Articular System II.
● Fasciae and topography (I part).

Shafigullina Aygul Kasyjmovna

● Muscle tissue and skeletal muscle.
