[www.publons.com](http://www.publons.com)

Система мотивации рецензентов и инструмент для издателей и редакторов, позволяющий искать рецензентов, автоматизировать работу с ними и повысить ее эффективность.

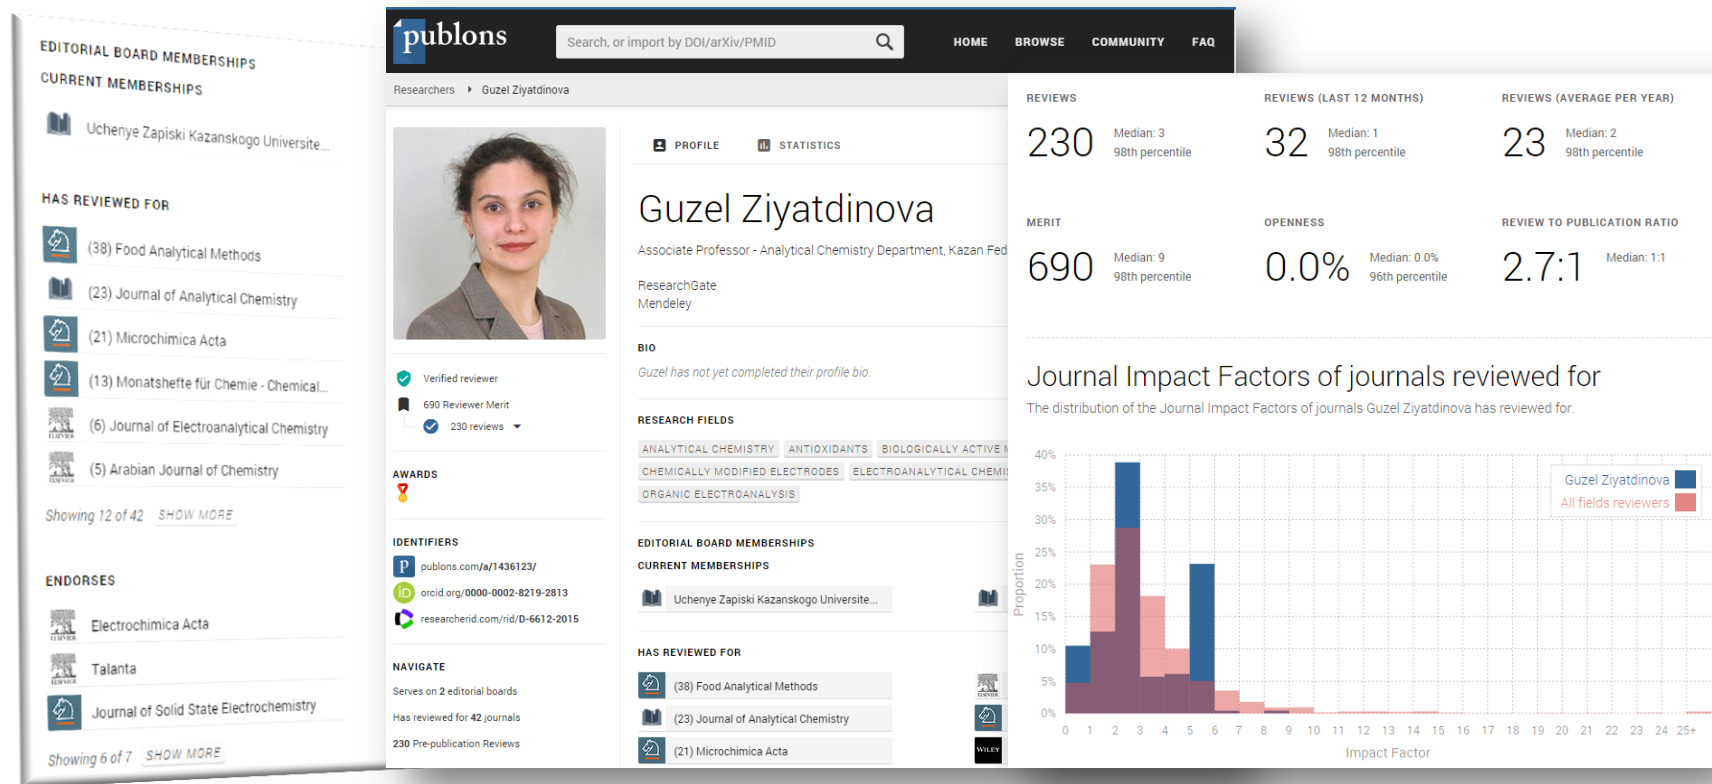

## Publons для рецензентов

Интеграция с Publons улучшает опыт работы рецензентов с первых этапов:

- рецензенты используют надежный канал связи с издательством;
- рецензенты получают «брендовые» письма от журнала к рецензентам;
- рецензенты получают электронные уведомления о выходе публикации, которую они рецензировали;
- профили рецензентов в Publons автоматически обновляются по результатам выполненной работы.

Publons превращает рецензирование в проверяемый и измеряемый результат работы ученых.

Title

State of the art and recent advances in the ultrasound-assisted synthesis, exfoliation and functionalization of graphene derivatives

Abstract

organic reactions as well as an excellent adsorbent. Reactions which used to take hours and days were significantly reduced to minutes with exceedingly high yields. In a more recent approach, sonophotocatalysis was employed for the combined effect of sonication and photocatalysis of metal deposited graphene. The system was highly efficient in organic dye adsorption. This review provides detailed fundamental concepts of ultrasonochemistry for the synthesis of graphene, its dispersion, exfoliation as well as its functionalization, with great emphasis only based on recent publications. Necessary parameters of sonication such as frequency, power input, sonication time, type of sonication as well as temperature and dual-frequency sonication are discussed in great length to provide an overview of the resultant graphene products.
