SECOND CIRCULAR

The Organizing Committee is pleased to invite you to participate in the VIIIth International Symposium “Design and Synthesis of Supramolecular Architectures” and IInd Youth School on Supramolecular and Coordination Chemistry, which will be held in Kazan (Russia), April 25–29, 2016. The Symposium and School will be focused on the all aspects of supramolecular chemistry and related fields of coordination chemistry, nanotechnology and advanced materials.

LOCATION AND TIME

The Symposium and School are organized by Kazan Federal University, A.E.Arbutov Institute of Organic and Physical Chemistry (Kazan, Russia), Russian Scientific Foundation, Russian Foundation for Basic Research in collaboration with D.I.Mendeleev Russian Chemical Society. [Grand Hotel Kazan](#) (Kazan, Petersburg str., 1) is selected as the conference venue for providing under-one-roof concept.

Arrival day is April 24, 2016. The scientific program will start on Monday, April 25, 2016 and the last scientific session is preliminary scheduled on Friday, April 29, 2016.

Kazan is the capital of Tatarstan Republic and is situated along the Volga River in the European part of Russia. City is within 800 km to east from Moscow. Kazan is one of the oldest university's cities and large scientific and cultural center of the Russia. This place is associated with the beginning of Russian organic chemistry and the names of outstanding chemists such as K.K.Klaus, N.N.Zinin, A.M.Butlerov, V.V.Markovnikov, A.M.Zajtsev, A.E.Arbuzov, B.A.Arbuzov. The spirit of chemistry of last centuries is carefully preserved in the museum of chemistry at the A.M.Butlerov Chemical Institute of Kazan State University.

Kazan is easily accessible by plane (Aeroflot, S7, Turkish Airlines, Finnair, Flydubai) or train.

SCIENTIFIC PROGRAM

The Conference program will include Plenary Lectures, Short Lectures and Poster Presentations. Scientific program will be organized around the following topics:

1. Molecular recognition phenomenon and host-guest chemistry
2. Self-assembly and self-organization systems
3. Biomimetic functional supramolecular systems
4. Inorganic supramolecular chemistry
5. Molecular machines and devices
6. Crystal engineering
7. Development of supramolecular and nanobased materials
8. Supramolecular and nanosystems in biology and medicine

LANGUAGE

English is the official Symposium language. No translation will be provided.
