IAGA Workshop on Geomagnetic Observatory Instruments, Data Acquisition and Processing

July 6-12, 2020, Kazan, Russia

1st Circular

Dear Colleagues!

In July 2020, the 19th IAGA workshop on geomagnetic observatory instruments, collection and processing at the Kazan Magnetic Observatory (KZN), Kazan Federal University will be held.

The workshop will consist of two parts:

1) from July 6, 2020 to July 12, 2020

IAGA Workshop, IAGA workshop will be devoted to observatory tools and methods in observatories, data collection and processing, observatory infrastructure.

2) from July 13, 2020 to July 16, 2020

The Summer School will be devoted to the practice of observational magnetic measurements, the study of magnetic field variations of lake sediments, methods for studying the Earth's magnetic field, formats for storing magnetic data, organizing their storage, the main sources of data and the methods of digitizing magnetograms. The summer school is intended for young technicians and scientists, as well as for new observers.

DEADLINES AND SCHEDULE

08/2019 Publication of the 1st Circular

11/2019 Publication of the preliminary program of the summer school

01/2020 Publication of the 2nd circular, Start of registration and annotation of the program

03/2020 Deadline for abstract submission and end of early registration March 25, 2020

05/2020 Publication of the 3rd circular, final program. The deadline for regular registration is June 15, 2020.

07/2020 IAGA Workshop and Summer School
